

# The road to AI-powered autonomous businesses

From manual to modern, how autonomous is your business?

**34% of ANZ mid-market businesses are already on the road to AI autonomy.\***

MYOB Acumatica helps you accelerate, connecting data, automating workflows and putting LLMs and agents to work safely.

Like cars evolving from manual to autonomous, businesses can move stage by stage toward smarter, faster operations.

**Ready to see what's possible next?**

\*MYOB Mid Market Report, November 2024

## Level 0 No Autonomy

Spreadsheets everywhere. Systems don't talk. People push data, not progress.

**Cars** Human at the wheel.

## Level 1 Driver Assistance

Basic automation (invoices, reminders). ERP keeps the books, you still call the shots.

**Cars** Cruise control, lane alerts.

## Level 2 Partial Autonomy

ERP automates workflows (payroll, order-to-cash). AI drafts. You approve.

**Cars** Adaptive cruise, lane-keeping.

## Level 3 Conditional Autonomy

LLM agents close the loop (reconcile, schedule). You step in only on exceptions.

**Cars** Self-drives on highways, needs takeover.

## Level 4 High Autonomy

AI agents run multi-system workflows end-to-end. You steer strategy, not the day-to-day.

**Cars** Vehicle drives itself in defined zones.

## Level 5 Full Autonomy

Fully autonomous enterprise. The business runs itself. AI agents price, supply, serve. You define vision and values.

**Cars** No steering wheel required.
