

Excel, accelerated.

Velixo turns Excel into a live extension of MYOB Acumatica, giving you the power of your ERP in the spreadsheets your team already use.

Stop exporting. Start refreshing.

Velixo connects Microsoft Excel directly to MYOB Acumatica. Reports update from live ERP data, no exports, no copy-paste, no rebuilding from scratch.

Your team stays in Excel. MYOB Acumatica stays in control.

Reporting slows with manual workflows

Every month, finance teams repeat the same cycle:

- Export ERP data
- Rebuild and reformat spreadsheets
- Manage multiple file versions
- Reconcile differences
- Re-key budgets and journals
- Log back in to answer one more question

Reporting becomes preparation. Analysis gets squeezed out.

With MYOB Acumatica+Velixo:

Excel at efficiency

Optimise, automate, and ditch repetitive spreadsheet downloads. No more exports, no rebuilding, no version conflict.

Excel at accuracy

MYOB Acumatica is your source of truth. Work from one version of the numbers. Speak with confidence in every conversation.

Excel at reporting

Your existing reports, refreshed in seconds with live data. Refresh with a click, push data back to the ERP. Build once, run endlessly.

Excel at insights

Live MYOB Acumatica data connected to your spreadsheets. Slice, pivot and interrogate the numbers without leaving Excel.

How it works

1

Connect

Link Excel to MYOB Acumatica using your existing permissions and access controls.

2

Build and refresh

Create reports in Excel, refresh instantly with live ERP data. No exporting, no rebuilding.

3

Drill down and write back

Interrogate balances, update budgets and post journals without re-keying anything.

From one workbook, your team can consolidate multiple entities, manage budgets and journal entries, and stay aligned with MYOB Acumatica roles and permissions.

Real outcomes, real customers

From months to minutes

“Some reports used to take us months. With MYOB Acumatica and Velixo, it's just so smooth, it's unbelievable really.”

Mike Hosking

Contracting Accountant
Havelock North High School

Weeks of work, gone

“MYOB Acumatica has saved us weeks of work. With all our financial data in one centralised system, we have confidence in our numbers.”

Paul Shrestha

Head of Finance
Revelop

The business impact

When reporting runs on live ERP data:

- Month-end closes faster
- Board reports reflect current performance
- Variances get explained immediately
- Finance focuses on analysis, not admin

Excel, accelerated. That's the difference.
